

Course Description

The Department of Mechanical Engineering at KIET was established in 1999. The department focuses on providing a practical, hands-on learning environment where ideas are explored, and students gain strong technical knowledge and skills. Our NBA accreditation reflects our dedication to quality education and student development. As part of an autonomous institute, our curriculum is designed to meet current industry needs and adapt to technological advancements, ensuring our students are well-prepared for the modern workplace.

The department is equipped with modern labs and workshops that offer students direct experience in core mechanical engineering areas. The CAM Lab, developed with Gauri Components, provides training on CNC lathes and VMC machines. In the Design & Realization Lab, students use 3D printers to transform concepts into working models. Our Automobile Lab features specialized engine setups for understanding vehicle performance. Additional labs for materials testing, fluid mechanics, heat treatment, and machine theory offer practical insights. Furthermore, workshops for welding, carpentry, forging, and machining help students develop essential industry-ready skills.

We enhance learning through our specialized Centers of Excellence and industry partnerships. The SAEINDIA KIET Collegiate Club, active since 2008, offers hands-on experience in building electric and solar-powered vehicles, with projects like SUPRA, E-BAJA, and ESVC. The Electric Vehicle Centre, supported by L&T EduTech, trains students in battery systems, powertrains, and EV charging technology. We have a collaboration with Mercedes-Benz India, where students have an access to their online training tool, WIS (Workshop Information system), which allows us to access their all technical details and functional description of all available products around the world including electric vehicles as well. Students got an opportunity to receive direct training on latest automotive systems (Engines and Transmissions), Networking and wiring diagram on E-Class Vehicle which results for strong placement support. Our Woodworking Centre, built with Italy based MNC, BIESSE India, teaches modern furniture and kitchen design using advanced Machines and latest software. Additionally, the Hero MotoCorp Skill Centre in collaboration with ASDC (Automotive skill development Council) provides real-time experience in two-wheeler maintenance and repair.

Key Highlights:

- Beyond academics, we encourage students to participate in clubs, events, competitions, and training programs to develop both their technical and personal skills.
- Our department maintains a strong placement record, with students securing roles in leading companies across the automotive, manufacturing, energy, and design sectors.
- Regular recruiters include Reliance Industries, JSW, Polycab, Adani, Thermax, and ISGEC.
- We provide a blend of knowledge, practical skills, and industry exposure to prepare students comprehensively for their future careers.

Vision

To become a preferred department providing innovative and research-oriented education in Mechanical Engineering for addressing global challenges.

Mission

- To impart quality professional education through innovative teaching learning.
- To inculcate cutting edge professional skills for developing industry ready engineers.
- To foster research, innovation, and entrepreneurial environment for sustainable development of global community.

Program Outcomes

- Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

- Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- Project management and finance: Demonstrate knowledge and understanding of engineering and management principles and apply these to one's own work, as a member or leader in a team, to manage projects in multidisciplinary environments.

- Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

- Est. Yr:1999
- Duration:4 Years
- NBA :Accredited
- Intake:
