

Course Description

The Department of Pharmacy (KSOP) at KIET was established in 2005. Our mission is to nurture the scientific and practical expertise of students to meet the requirements of future Pharmacists. The course is approved by Pharmacy Council of India (PCI). With NBA accreditation, the department offers a constantly updated curriculum designed by both academic and industry experts to gain exposure to cutting-edge pharmaceutical techniques, instrumentation and analytical methods through well-equipped labs. Our focus is on developing problem-solvers, innovators, and future leaders, not just programmers. Choosing 'School of Pharmacy' at KIET, means selecting a program built for the future, supported by modern infrastructure and global exposure.

Key Highlights:

- Modern, well-equipped classrooms and labs with sophisticated instruments such as Gas Chromatography, Atomic absorption Spectrophotometer, HPLC, FT-IR, NIBP apparatus, Western blotting, gel documentation system, Varsa Trek Automated microbial detection system, FBD, etc.
- Dedicated Centres of Excellence such as Modular Pharmacology including Centre of excellence in Tuberculosis, Molecular Pharmaceutics including Krismatic Naturals Product development and Central Instrumentation Facility (C.I.F).
- Well established animal house facility for pre-clinical research.
- Value added courses integrating python programming language and Emerging Technologies in Pharmacy (ETP) for Artificial intelligence and healthcare.
- Strong research culture with 120+ patents filed and 560+ research papers published
- Student achievements in various International and National events, and medals in academics at University level.
- Research papers published by faculty along with research grants and consultancy in different domains.

- Academic and industry collaborations for real-world exposure including IPA-DSB, CPA (Lucknow), IIPH, DPSRU, Vytals Well being, Lozenges healthcare, Vita Munch.
- Consistent placement record with more than 95% placement of students with top global recruiters.

This blend of innovation, industry connections, research strength, and consistent placements ensures excellent career opportunities for our graduates while nurturing them into competent professionals ready for the global tech landscape.

Vision

To become a leading school in Pharmaceutical Sciences and Research to meet the needs of industrial and global community.

Mission

- To impart quality education in diverse fields of pharmaceutical sciences to improve human health.
- To provide strong fundamental knowledge in order to fulfill the demands of industries and community at large.
- To foster a conducive environment for academia multidisciplinary & socially relevant research and innovation.

Program Outcomes

- Pharmacy Knowledge: Possess knowledge and comprehension of the core and basic knowledge associated with the profession of pharmacy, including biomedical sciences; pharmaceutical sciences; behavioural, social, and administrative pharmacy sciences; and manufacturing practices.
- Planning Abilities: Demonstrate effective planning abilities including time management, resource management, delegation skills and organizational skills. Develop and implement plans and organize work to meet deadlines.

- Problem analysis: Utilize the principles of scientific enquiry, thinking analytically, clearly and critically, while solving problems and making decisions during daily practice. Find, analyze, evaluate and apply information systematically and shall make defensible decisions.
- Modern tool usage: Learn, select, and apply appropriate methods and procedures, resources, and modern pharmacy-related computing tools with an understanding of the limitations.
- Leadership skills: Understand and consider the human reaction to change, motivation issues, leadership and team-building when planning changes required for fulfilment of practice, professional and societal responsibilities. Assume participatory roles as responsible citizens or leadership roles when appropriate to facilitate improvement in health and wellbeing.
- Professional Identity: Understand, analyze and communicate the value of their professional roles in society (e.g. health care professionals, promoters of health, educators, managers, employers, employees).
- Pharmaceutical Ethics: Honour personal values and apply ethical principles in professional and social contexts. Demonstrate behaviour that recognizes cultural and personal variability in values, communication and lifestyles. Use ethical frameworks; apply ethical principles while making decisions and take responsibility for the outcomes associated with the decisions.
- Communication: Communicate effectively with the pharmacy community and with society at large, such as, being able to comprehend and write effective reports, make effective presentations and documentation, and give and receive clear instructions.
- The Pharmacist and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety and legal issues and the consequent responsibilities relevant to the professional pharmacy practice.
- Environment and sustainability: Understand the impact of the professional pharmacy solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

- Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change. Self-access and use feedback effectively from others to identify learning needs and to satisfy these needs on an ongoing basis.
